

Project Manager

Level 4 Apprenticeship

Programme Guide

Why QA?

Endorsed by 4,000+ global clients, we are the leader in applied and cohort-based learning academies.

Today's biggest technological shifts are shaped by AI, cloud, and data.

In every technology revolution, there are winners and losers – and teams with applied skills make all the difference. We believe you can't change an organisation unless you change the capabilities of its people and ensure human and machine intelligence work together.

Creating Change

Project management turns into ideas and results.

This programme equips your organisation with the critical skills to achieve goals through streamlined project delivery and operational efficiency, effectively managing increasing complexity and scale.

Our apprenticeships drive business results by empowering organisations to apply skills consistently at speed and scale.

Cultural Excellence

Elevate in-house project management standards.

Streamline Execution

Achieve timely, budget-friendly, and high-quality project delivery.

Certified Expertise

Gain certification in PRINCE2 Foundation or APM PMQ.

Digital by Design

Our market-leading approach accelerates skill development and achievement through our **Discover, Practise, Apply** methodology, ensuring that both learners and employers are fully supported throughout their programme.

Discover

Leveraging QA's learning platform, learners follow a development path focused on their job role.

Practise

Learners join instructor-led sessions, practise skills in hands-on, risk-free labs, and collaborate with peers.

Apply

Learnings are applied on the job through work-based activities at key stages, supported and reviewed by specialist DLCs.

Programme Overview

Details of standard: Associate Project Manager

Total cost: £7,000

Programme duration: 18 months

Live instructor sessions: 11 days

Experience QA's self-paced learning with interactive labs and AI-powered learning assistant.

Learner Journey

The Project Manager programme integrates live and online workshops with self-paced learning, employing a guided discovery approach for individual learner contexts.

Learners are assigned a Digital Learning Consultant (DLC) for personalised coaching and support. These specialists ensure their successful progress, wellbeing, and readiness for assessments.

Modules

Following each module, learners apply their newly acquired knowledge and skills to ongoing work projects.

01

Module 1: Project Management 101

Introduces project management fundamentals – to deliver successful projects on time, within budget, and to the desired quality.

It explores key frameworks and methodologies such as Waterfall, Hybrid, Agile, and PRINCE2.

Topics:

- Projects vs Business as Usual
- Roles & Responsibilities
- Ethics & Professionalism
- Project Context & Governance
- Agile, Hybrid & Waterfall Project Management
- Project Management Frameworks & Methodologies

Live Instructor Sessions: 1 Day

02

Module 2: Stakeholder Management

Examines effective stakeholder management and engagement – focusing on navigating evolving project dynamics, fostering strong relationships and overcoming challenges to achieve project success.

Topics:

- Identifying Key Stakeholders
- Stakeholder Influence & Interests
- Communication Techniques
- Collaboration & Best Practices
- Managing Stakeholder Impact
- Strengthening Relationships

Live Instructor Sessions: 2 Days

03

Module 3: Concept and Business Case

Covers essential elements of building a business case centered on project outputs and comparing key concepts, comparing key concepts from initial stages to meet project requirements.

Topics:

- Concept Phase
- Data in the Business Case
- Defining Project Scope
- Integrating Project Management Components
- Governance Process
- Improvement Initiative or Update Existing Workplace Project

Live Instructor Sessions: 0 Days

04

Module 4: Project Finances

Explores budget development – with financial performance monitoring, procurement, and contract management, with a focus on cost-effectiveness and sustainability.

Topics:

- Estimating Methods
- Project Budget
- Financial Monitoring & Reporting
- Contractual Management & Procurement
- Ethical & Sustainable Considerations

Live Instructor Sessions: 1 Day

05

Module 5: Project Planning

Focuses on creating a project plan with a defined scope and schedule, including work breakdown structures, network diagrams, and key elements like float, critical path, and resource requirements.

Topics:

- Project Management Plan
- Resource Allocation & Histogram
- Project Scheduling
- Integrated Schedules
- Information Management

Live Instructor Sessions: 1 Day

06

Module 6: Digital Tools and Technology

Exposure to software and digital tools designed to enhance productivity and support project objectives – focusing on data literacy, visualisation, and AI integration.

Topics:

- Digital Tools
- Project Management Software & Technology
- AI & Emerging Technologies
- Data Literacy & Visualisation

Live Instructor Sessions: 1 Day

07

Module 7: Risk and Issue Management

Covers risk identification and analysis within projects, response strategies, and using data-driven insights to mitigate threats and ensure project success.

Topics:

- Risk Management Process
- Risk Identification & Analysis
- Risk & Issue Management
- Reporting Risks & Issues
- Data-Driven Decision Making

Live Instructor Sessions: 1 Day

08

Module 8: Project Monitoring and Quality

Explores project change management, monitoring, quality control, performance interpretation, audits, success metrics, and integration of net-zero sustainability goals.

Topics:

- Information Management
- Change Control
- Quality Standards
- Progress Monitoring & Reporting
- Project Reviews
- Quality Control
- Project Sustainability

Live Instructor Sessions: 1 Day

09

Module 9: Management and Leadership

Examines key management and leadership skills to effectively execute project plans and navigate the entire project lifecycle.

Topics:

- Leadership Styles
- Management Skills
- Conflict Resolution
- Negotiation Techniques
- Transition Stage

Live Instructor Sessions: 1 Day

10

Module 10: ProjectXperience

Provides an immersive workshop that consolidates the project lifecycle and provides hands-on experience managing projects for a holistic understanding of project delivery.

Live Instructor Sessions: 2 Days

Tools and Technologies

Communication and Collaboration

- Trello
- Slack
- Monday.com

Project and Task Management

- Jira
- Asana
- Microsoft Project

Budgeting and Data Visualisation

- Microsoft Excel
- Power BI

End-Point-Assessment

We ensure all learners are fully prepared for their End-point-Assessment (EPA) through our internal gateway process, maximising their success rates.

Assessment criteria:

01

Knowledge

Ability to convey knowledge effectively.

02

Skills

Demonstrate practical skills with confidence.

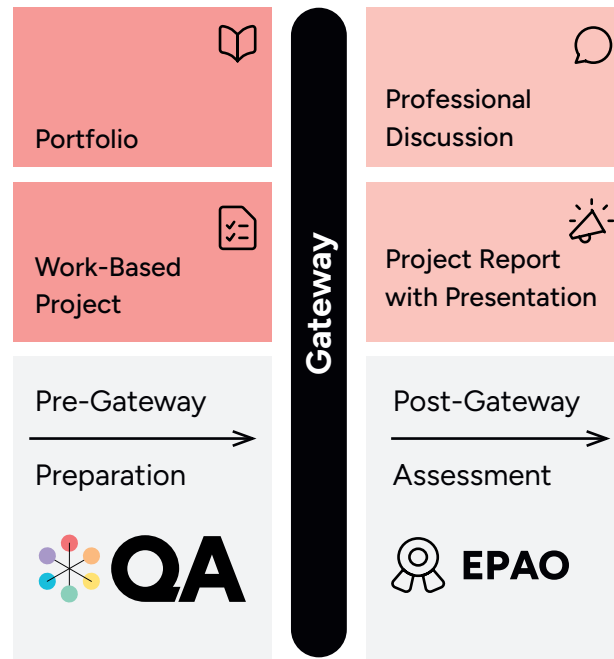

03

Behaviour

Exhibit professional workplace behaviour.

Explore the detailed assessment criteria within the **Associate Project Manager standard**.

EPA process:

Professional Discussion: Engage in a formal two-way conversation to showcase knowledge, skills, and behaviours.

Project Report with Presentation: Prepare a project report, demonstrate achievements and knowledge, and participate in a Q&A.
